1. Introduction

Global Computers is established 1999 to be a local software development company. Since the establishment year and we maintain 100% Omanization. Global Computers

We are very proud to be the Omani company that was selected to receive His Royal Highness Prince Charles visit in 2013. Since its establishment in 1999 and the Global Computers is maintaining a 100% Omanization. We are very proud with lots of Arabic and English projects delivered to our clients in both government and private sectors. We are very proudly would like to assist Small and Medium Entrepreneurs to run their business smoothly and effectively by introducing our package of systems. All these systems were developed to suite Oman market in very competitive prices. We are putting more than 30 years of our software development experience to serve our customer in a very friendly way.

Global Computers was awarded His Majesty Sultan Qaboos Award for best SME eServices 2018. Global Computers provided Saharat Al'Shamil (SAH) on our private cloud for the public users. The SAH is an Enterprise Resource Planner (ERP) solution that included on multiple modules such as Human Resources (HR), Finance, Sales, Purchase, Customer Relationship Management (CRM), Transportation and administration.

We are very proud to be the Omani company that was selected to receive His Royal Highness Prince Charles visit in 2013.

Global Computers is committed to providing its services by trained employees on the latest technologies and software. Global Computers enforce the implementation of the software development using tailored ISO and IEEE standards to suit the Sultanate market. The implementation covers all steps starting from the user requirements and ending to the user acceptance test and deployment of the project in the production environment.
2. Policy purpose
